

Summer Math Reinforcement for Middle School Students

Your child has had a busy year learning new math skills. Mastery of all these skills is extremely important in order to develop a solid math foundation. Next year these skills will be further developed and new concepts will be introduced.

Any time spent reinforcing the concepts learned this year will be very beneficial for your child.

Please encourage your child complete 30 minutes of math practice **each week**. This practice can be done online at any of the web-sites listed below.

A copy of the list of these websites, with the hyperlinks, may be found on the St. Paul Catholic School website under the summer reading tab.

Students taking Algebra 1 next year, please pay special attention to operations with rational numbers. Spend lots of time practicing computation with both positive and negative fractions, decimals, and integers.

Have a great summer!
